# i-Hotel Conference Tool : customize your network for each meeting

## TECHNICAL SPECIFICATIONS

FEATURES	INCLUDED
Cloud-based platform communicates with your i-Hotel HSIA Gateway and reprograms wireless controllers and wired switches based on your scheduled meetings	✓
Easy-to-use 5-step wizard allows creation of custom networks for meetings.	✓
For each meeting, you can customize:	
↳ Meeting SSID	✓
↳ Optional WPA password	✓
↳ Captive portal look & feel & landing page URL	✓
↳ Set global conference speed limits for users groups within the conference	✓
↳ Maximum number of customer devices allowed	✓
↳ Decide whether conference can use only WIFI, only wired connections or both	✓
↳ Allow or block inter-device communication: allow customers to bring their printers, servers, etc.	✓
↳ Guest device statistics and meeting bandwidth usage graphs	✓
Meeting bandwidth threshold email alerts	✓
Schedule custom networks that will automatically be created and removed according to your meeting schedule	✓
Multi-Meeting: create multiple customized meetings	✓
Multi-User: create staff access codes and obtain activity audit reports	✓
Multi-Hotel: if you own multiple hotels, configure meetings in any hotel easily and quickly	✓
Increase your meeting space revenue by providing custom networks or bill services according to number of users, Internet speed provided, etc.	✓
