

Cloud hosted PBX for hotels

Eliminate PRTs and bulky PBX with a solution approved by all major brands.

- ✓ Switch to VoIP without replacing your guest room phones
- ✓ Eliminate your onsite PBX entirely
- ✓ Upgrade with the latest technology (including forward to cell, wake-up calls, PMS integration, etc.)

Switch to our hospitality VoIP cloud PBX solution and upgrade to the latest technology

Our VoIP solutions are specifically tailored for the hospitality industry and are approved for use in all major hotel brands and independent hotels across Canada.

Leveraging state of the art cloud PBX technology, we eliminate the bulky onsite PBX and can support your legacy guest room phones as well as the latest IP phones. Cancel your PRI and switch to our solution, powered by VoiceWare from Phonesuite, one of the leaders in hospitality telephony for over 25 years. Whether you are looking to replace your existing solution or build a new hotel, our solution will fit your budget and your needs.

Intello is proud to offer hospitality analog and SIP guest-room phones by Bittell and V-Tech, as well as the latest Yealink phones for your hotel's front desk, administrative offices and conference rooms.

Best of all, with our solution, you can cancel your PRI service and save thousands of dollars each year.

Features include:

- Call accounting
- Voicemail
- PMS integration compliance
- Full hospitality feature set
- Deployment/integration services
- 24/7 hardware & software support
- SIP trunking-local/long distance

Intello is a proud reseller of the following phones:
