

The ultimate Wi-Fi experience

Offer a premium guest experience with fast, reliable Wi-Fi they need for work or play.

Turnkey solutions available including:

- ✓ Guest Internet management gateway
- ✓ Wi-Fi equipment & installation
- ✓ Outstanding 24/7/365 support & service

Intello managed Wi-Fi: more than just internet access

Available features

Bandwidth pooling: control total bandwidth allowed for a group of devices (ex: 1 customer's laptop, mobile phone and tablet can be limited to a combined speed of 15Mbs/s).

Multiple zones: setup several zones with different login pages and options all with one single gateway. VLAN compatible. Inter-zone roaming is configurable to allow or prevent roaming from one zone to another.

Provide free-to-guest and /or tiered billing via PMS, credit card or manual billing options - tiered billing options allow increased revenue and ROI.

Brand standard login pages for most major hotel brands, including "self-serve" guest login via PMS authentication and/or authentication codes, including group and conference codes.

Client to Client blocking: guests are isolated from each other to protect against potential hacking and virus attacks from infected guest computers.

24/7/365 bilingual tol-free in-house helpdesk available for both hotel staff and hotel guests.

24/7/365 proactive remote equipment monitoring.

Enterprise grade access points, switches and gateway.

Own, lease or choose Wi-Fi as a Service with \$0 upfront investment and a simple monthly fee.

Optional modules: Conference tool, PMS interfaces, P2P filtering and casting solution.
